FIBRE PROTECT

PREMIUM STAIN PROTECTION

FOR CARPETS, RUGS & SOFT FURNISHINGS

FIBRE PROTECT

FORMS AN INVISIBLE SHIELD AROUND YOUR CARPETS AND FURNISHINGS, MAKING SPILLS AND STAINS EASIER TO REMOVE.

A unique protective finish that can be applied to virtually any type of carpeting, rug, upholstery and drapery fabric to protect against dirt, spots and stains.

Whether your carpets and furnishings are new or about to be professionally cleaned by Carpetsure Fibre Protect will add years of life as well as giving you peace of mind over that spilt cup of tea or glass of wine. Fibre Protect helps keep spills from becoming hard-to-remove spots and stains.

It repels liquids, so spills can be blotted up quickly and more efficiently. Vacuuming is also more effective with Fibre Protect. Dirt is more easily picked up, and fewer passes are required with the vacuum.

FIBRE PROTECT will give you the highest level of protection available. Treated items are completely safe for your children and pets, in fact by treating them you are ensuring you can keep them cleaner and healthier for your family.

HELPS ACHIEVE THE FOLLOWING:

- Helps fibres resist soiling.
- Provides protection against accidents.
- Makes spots & spills easier to clean.
- Carpets and soft furnishings stay cleaner for longer.
- Keep your carpets looking showroom fresh.
- Reduces wear and abrasion, especially in high traffic areas.

What to do when an accident happens?

Act immediately!

Remove any solids with a blunt knife or spatula, blot up any liquid spillage with an absorbent white towel or kitchen roll. Continue blotting by applying pressure until there is no further transfer of liquid. Do not rub or use abrasive material. Apply Carpetsures spot and stain remover to any remaining stain, stay within the confinements of the stain and continue to blot. Repeat this process until the stain is no longer visible. Following this process will remove a large percentage of stains.

Do I need to protect my carpets and soft furnishings?

It is always beneficial to have a protector applied. If you leave your carpets/soft furnishings unprotected they are more vulnerable to:

- **PERMANENT STAINING**
- **WORN LOOKING TRAFFIC AREAS**
- **SPILLS THAT WON'T CLEAN UP SO EASILY**
- **SOIL THAT CLINGS TO THE FIBRES**

How does it work ?

An invisible barrier is created that coats the fibres and fills the dye sites on certain fibres. This allows you to mop up any spillages that occur. The longer a spillage is there the more difficult it will be to remove it.

How long does it last?

Studies have shown that it can last from 1-3 years but this really does depend on the amount of traffic in your home. It should be reapplied when you next have your carpets or soft furnishings cleaned so it is giving you maximum protection.

Is it safe for me, my children and pets?

Absolutely, once dried it is perfectly safe for all in your household We always advise that when we are applying the protector that you stay out of the area and be careful whilst the item is drying.

How is Fibre Protect applied?

Fibre Protect is applied through a spray application and can be applied to new or freshly cleaned carpet/soft furnishings.
